

# Within Word Pattern Sorts For Spanish Speaking English Learners Downloads Words

Within word pattern sorts are a type of phonics activity that can help Spanish speaking English learners to identify and manipulate the sounds in words. These activities can help students to develop their phonemic awareness, which is the ability to hear and manipulate the individual sounds in words. Phonemic awareness is an essential skill for learning to read and write.

Within word pattern sorts can be used to teach a variety of different phonics skills, such as:

\* Identifying the beginning, middle, and ending sounds in words \*  
Identifying and manipulating consonant blends and digraphs \* Identifying  
and manipulating long and short vowel sounds \* Identifying and  
manipulating diphthongs

## **How to Use Within Word Pattern Sorts**

Within word pattern sorts can be used in a variety of ways. One common way is to use them as a whole group activity. The teacher will say a word and the students will listen for the target sound. The students will then sort the word into the correct category.

For example, the teacher might say the word "cat." The students would then listen for the beginning sound in the word. They would then sort the word into the category for words that begin with the /k/ sound.

Within word pattern sorts can also be used as an independent activity. Students can work on their own to sort words into different categories. This can be a good way for students to practice their phonics skills and to learn new words.

## **Benefits of Within Word Pattern Sorts**

There are a number of benefits to using within word pattern sorts in the classroom. These benefits include:

- \* They help students to develop their phonemic awareness.
- \* They help students to identify and manipulate the sounds in words.
- \* They help students to learn new words.
- \* They can be used as a whole group or independent activity.
- \* They are a fun and engaging way to learn about phonics.
